1 Introduction

FUSION is a national funding programme that drives and supports local Research and Innovation (R&I), as well as providing the necessary support for researchers and technologists to turn their innovative ideas into a market-ready reality. FUSION is supported through Malta Government funds and is managed by Xjenza Malta as the Managing Authority.

The main objectives of FUSION are:

- To raise the level and profile of locally funded research
- To ingrain R&I at the heart of the Maltese economy
- To spur knowledge-driven and value-added growth
- To sustain improvements in the quality of life

These can be achieved since research results and innovation have the potential of translating themselves into commercial activities which generate a multiplier effect on the economy, by increasing Malta's competitiveness through the creation of additional high-value and knowledge intensive employment opportunities in Malta's priority industries.

FUSION is composed of various programmes. These programmes are designed in a way to offer the necessary mentoring and financial support for researchers and technologists to develop their ideas for the betterment of society.

2 Voucher Programme

The Xjenza Malta Voucher Programme (the “Programme”) is designed to help businesses and researchers to valorise their innovative technologies. The vouchers offer financial support for projects funded by Xjenza Malta that have reached an applied stage of development (Technology Readiness Level 5 or higher) and will be supported by service providers approved by the Managing Authority.

Three types of vouchers will be available:

1. Intellectual Property Registration €20,000 (IPR) Aim: To provide inventors with the opportunity to protect their intellectual property rights, safeguarding their invention from potential infringement.
2. Business Plan €12,000 (BP) Aim: To create a comprehensive business plan that informs investors of the business's operations, financial projections, and return on investment, while outlining goals, risk management strategies, and marketing plans for success.
3. Market Discovery €4,000 (MD) Aim: To assist beneficiaries in finding opportunities to showcase their innovations, while preparing them to engage with potential investors. and ideal investment avenues, organizing meetings, and tailoring presentations to effectively engage investor interest by highlighting competitive advantages, financial performance, and exit strategies.

Each voucher will be awarded to up to 10 projects on a first come first served basis, though this may be adjusted based on demand. Applicants can apply once their research grant agreement is finalized.

3 Intellectual Property Registration Voucher

This Voucher will cater for the registration of Intellectual Property.

The Intellectual Property Rights (IPR) registration process provides inventors with essential protection against potential infringement, offering multiple levels of security for their creations. Innovators can apply for national protection through the Malta Industrial Property Registration system. At a European level, the EU Intellectual Property Office (EUIPO) offers broader protection across EU Member States, while

international registration through the World Intellectual Property Organization (WIPO) is also available for globally safeguarding Maltese IP rights.

There are five main types of intellectual property rights:

1. Trademarks – Unique graphics that distinguish products or services.
2. Copyrights – Automatically granted protection for original works upon creation.
3. Industrial Designs – Protects the aesthetic design aspects of an object, requiring novelty.
4. Trade Secrets – Protects commercially valuable, confidential information under strict conditions.
5. Patents – Exclusive rights for innovative products or processes, granting 20 years of protection from the application date.

IP registration typically takes one to three years from the initial application. During this time, the service provider will update the IP Check report, recommending specific IP rights to pursue based on an initial 4-week review period, and collaborating on timelines for each stage. The service provider will also support the beneficiary through each phase, from updating the IP Check report to patent publication, with reimbursement issued by the Xjenza Malta upon submission of payment receipts.

Through this process, inventors receive tailored guidance and protection to maintain their IP's value and competitive advantage in the market.

3.1 Voucher Scope and Focus

The Voucher provides financial support for novel technologies which have reached the prototype stage (TRL 5+) with a Xjenza Malta research approved grant. Inventors are provided with the opportunity to protect their intellectual property rights, safeguarding their invention from potential infringement.

External Evaluators will be evaluating applications on the following criteria:

8.1 Excellence (50% Threshold: 30%)

- What is the current TRL of your prototype? (e.g., TRL 1–9). Briefly describe the current development stage of your prototype and provide a high level plan for its continued future development.
- Does the concept appear to be novel? Please perform a basic IP check and identify any potential infringing IP and prior arts.
- Is the timing right for the IPR filing, considering the current level of development?

- Is the commercialisation plan proposed adequate and reasonable for the technology is to be protected?

Implementation (50% Threshold: 30%)

- Please outline the strategy for protecting your IP including the form of IP protection (e.g. Patent, Trademark etc..). Outline the areas which the IP will cover and what component of the technology will be protected.

9 Duration

The IPR Voucher remains valid for up to three and a half years from the date of the final signature in the grant agreement and the budget must be utilised within this timeframe.

Since patent registration processes vary considerably depending on a myriad of factors such as national laws, patent office backlogs, the receiving body as well as the quality of the patent application itself, Xjenza Malta deems it more pragmatic that the Service Provider designs the timelines which would best suit the exigencies of the application in question.

The Voucher Programme will close once all funds have been exhausted.

Additionally, the programme will temporarily close during the following periods:

- June 30th to August 31st
- December 1st to January 9th

Applications submitted during these periods will not be processed. Additionally, if an application is received during this time, the applicant may be required to resubmit after the temporary closure, incorporating any new changes implemented in the call documentation.

10 Terms and Conditions

By applying to or participating in this program, you acknowledge that you have read, understood, and agreed to the terms and conditions.

11 Scenario Two

At the discretion of Xjenza Malta and the Commerce Department, applicants may choose a Maltese priority filing through the Commerce Department. This option could allow applicants to benefit from up to an 80% fee reduction for drafting a search report, including a written opinion by the EPO.

It is important to highlight that this 80% fee reduction will help the applicant maximize the utilization of the €20,000 grant.

Interested applicants are to contact the Programme Coordinator if they wish to make use of the alternative filing.
